

BLUE STEEL

Crowder Blue Steel

From Crowder Rods, maker of the highest performing fishing rods on the market, comes yet another breakthrough, the Blue Steel Series. Crowder's new Blue Steel line is the most advanced rod on the market, featuring a proprietary blend of 72 million modulus high strain carbon fiber. New technology gives the Blue Steel an infused outer coating to reduce the chances of outer fracture, while Fuji Sic guides, Fuji reel seats and high grade cork combine to create the most powerful, lightweight rods available. But technology isn't everything; Crowder's legendary craftsmanship and attention to detail, like a unique Titanium plug, give the Blue Steel rods unprecedented balance and durability. The Blue Steel inshore line was designed and manufactured in Stuart, Florida and tested on the area's tremendous inshore population of snook, tarpon, seatrout and redfish. **Anglers who know, choose Crowder.**

Crowder Fly Rods

Crowder Rods, manufacturer of the high-performance Blue Steel Series inshore rods has applied the Blue Steel technology to the all-new Blue Steel line of fly rods. These high-performance, ultra-fast rods are constructed of a proprietary 72 million modulus high strain carbon fiber blend combined with an infused outer coating to virtually eliminate chance of fracture. The Blue Steel fly rods also incorporate the highest quality components available: Fuji Alconite stripper guides, large loop stainless snake guides, an aluminum reel seat, and AAAA-grade cork grips. An unbelievable value at a retail price under \$400, Crowder Blue Steel fly rods are the best performing, highest value fly rods on the market today
